

OUPi Robot Sumo: Kit Inventory

Pack list for the Zumo 2040 sumo kit. Tick each item as it goes in and out of the box.

Box checked by: _____ Date: _____

In the box

Item	Qty	Notes	Packed
Zumo 2040 robots	3	Two compete, one spare. Each shows its A/B/C letter on its display.	☐
Linux laptops with Claude Code	2	Run the build-and-flash workflow over USB. Two so both pit stations can build at once.	☐
Laptop chargers	2	Power adapters for the two laptops.	☐
USB-C cables	2	Connect a robot to a laptop for flashing (one per station).	☐
Rechargeable AA batteries	16	Four per robot (twelve in use) plus one spare set of four.	☐
Battery charger	1	Charges the AA cells.	☐
Battery charger cable	1	Power cable for the charger.	☐
Spare robot track	1	Replacement rubber tread.	☐
Color strip tape (robot ID)	1	Mark each robot with its team color.	☐
Gaffer's tape	1 roll	Not needed so far; the arena boundary is the board's physical edge.	☐

Easy to forget (confirm before an event)

Not on the list above, but the activity depends on these. Worth a quick check:

Item	Why it matters	Have it
Sumo arena / board	The bare-wood ring with the drop-off edge. It is the match surface itself, so nothing runs without it. This is the big one to confirm.	☐
Printed QUICK_START and the repo address	Print QUICK_START.pdf and note github.com/jhassell/oupi-zumo-sumo, so anyone can set up from scratch.	☐
Scissors	For cutting the color strip and gaffer tape.	☐
Power strip and outlet access	The chargers and the laptops all need power at the venue.	☐
